ONELOGIN FEATURE DETAILS

Cloud Directory	Manage and authenticate users directly in OneLogin instead of a local directory.
Single Directory Integration	Connect one Active Directory or LDAP server with OneLogin.
Desktop Single Sign-On (SSO)	Automatically sign users into OneLogin when they are signed into their Windows domain.
Mobile Single Sign-On (SSO)	Use OneLogin Mobile to give users one-click to their web apps on smartphones and tablets.
Custom Branding	Customize OneLogin with a branded login page and portal, using your logo and color scheme.
Advanced Password Reset	Reset OneLogin or directory password using security questions.
Standard Reports	Use more than a dozen standard reports that show login activity, user privileges etc.
Multiple Directory Integration	Connect multiple Active Directory or LDAP directories to OneLogin.
Multiple Languages	Support users in many different countries with more than 20 different languages.
Custom Reports	Build your own reports from scratch.
Security Policies	Define custom security policies for users and apps.
Custom Connectors	Build custom connectors to your in-house apps.
Trusted IdP	Enable users to sign into OneLogin via SAML from identity providers in the cloud and behind the firewall.
Social Sign-In	Social Sign-In lets end users sign in to OneLogin using Facebook, Google+, LinkedIn, Twitter.
SIEM Integration	Send OneLogin events to Splunk, ELK, Sumo Logic, and Loggly for additional analysis and visualization.
Multi-factor Authentication	Protect login with a second authentication factor from OneLogin, Duo, Google, RSA, Yubico and others.
RADIUS	Authenticate users from network devices that support RADIUS, e.g. Cisco VPN.
VPN Integration	Provide seamless integration with Juniper SSL VPN.
User Provisioning	Create, update and remove users automatically in the applications that your organization uses.
On-Prem Provisioning	Provision users into on-premise applications behind the firewall using OneLogin's SCIM Agent.
Custom Fields and Mapping	Extend users with custom fields and provision these custom fields into applications.
Directory Provisioning	Create, update and remove users in Active Directory from OneLogin, i.e. in conjunction with Workday.
Workday Integration	Use Workday as the system-of-record for users and automatically import users into OneLogin.
UltiPro Integration	Use UltiPro as the system-of-record for users and automatically import users into OneLogin.
Namely Integration	Use Namely as the system-of-record for users and automatically import users into OneLogin.
On/offboarding Checklists	View and check off tasks required to onboard new users, and offboard departing users.
