Accelerate Your Cloud-First Strategy with OneLogin for Samanage

Trust OneLogin to take complete control over Samanage access, provision and deprovision users in real-time, create and enforce security policies, and add a second factor of authentication. Samanage is a leader in employee service management, driving exponential productivity and satisfaction across organizations of all sizes. Together, OneLogin and Samanage give end-users an experience they love and IT the security and control it needs.

OneLogin for Samanage Highlights

Provisioning

Multi-Factor
Authentication

Strengthen Your Identity Strategy With These Benefits

Protect Access to Samanage and All Apps

You host a variety of data across your organization. Secure access and accelerate user adoption by allowing employees to use their master credentials to log into Samanage and all their corporate SaaS applications.

Eliminate Deployment Complexity

Leverage OneLogin's pre-built user provisioning integration and powerful mappings and rules engine to automate the deployment process to Samanage. Spend less time on manual entry and more time on other IT initiatives.

Decrease IT Operations and Support Costs

Free up IT time and resources with built-in self-service password reset and automated user provisioning and deprovisioning based on user's directory attributes or security groups originating from your corporate directory.

Customize Security Controls

Create and enforce customized security policies such as multi-factor authentication, password complexity, session timeout, and more. Easily map those policies based on user attributes or other identifiers such as IP address.

Advanced Security and Scalability

Rest easy with redundant data centers in the US and Europe, massive scalable infrastructure, quarterly security reviews by iSEC partners, and 24/7 monitoring. 99.9% Uptime Guarantee.

Over 2,000 enterprise customers globally secure their applications with OneLogin

Integrates with Your Existing Directory Infrastructure

OneLogin acts as a secure, virtual directory in the cloud, allowing you to easily synchronize users across any number of directories, including Active Directory (AD), LDAP, Google Apps directory, OneLogin cloud directory, and certain HCM platforms. Import user attributes and pass them on to Samanage and other downstream applications via SAML or API-based provisioning.
