State of Federal IT
Security

Federal IT professionals are **concerned about security.**

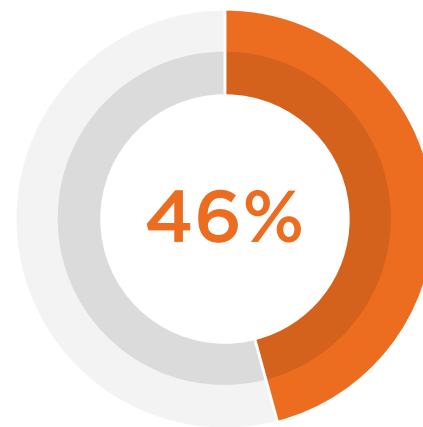

Top concerns among IT professionals at federal agencies:

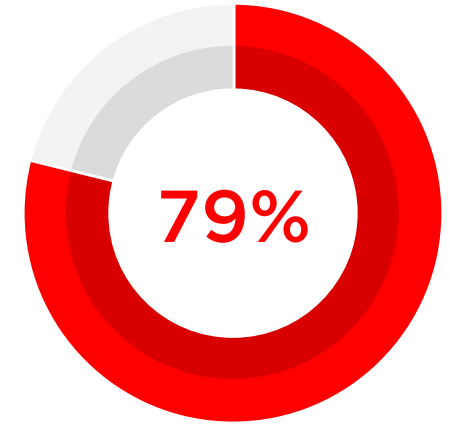

Device theft

Ransomware attack

Phishing attack

Malware attack

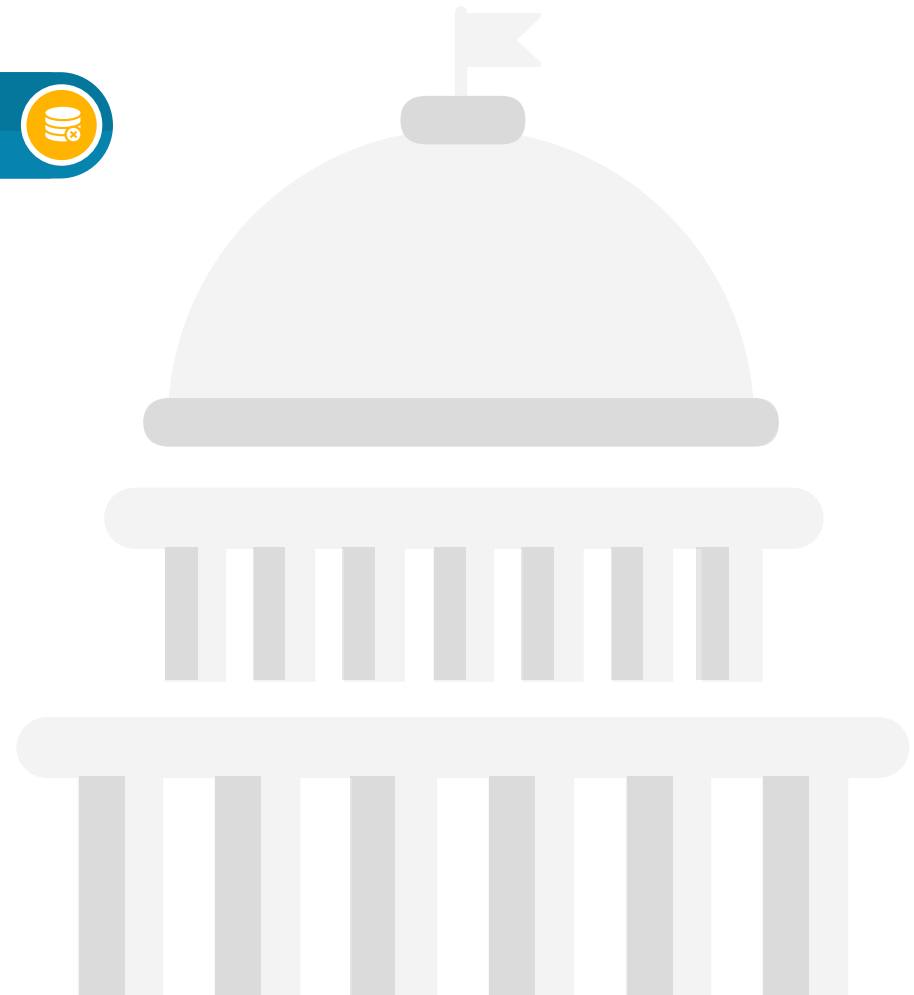

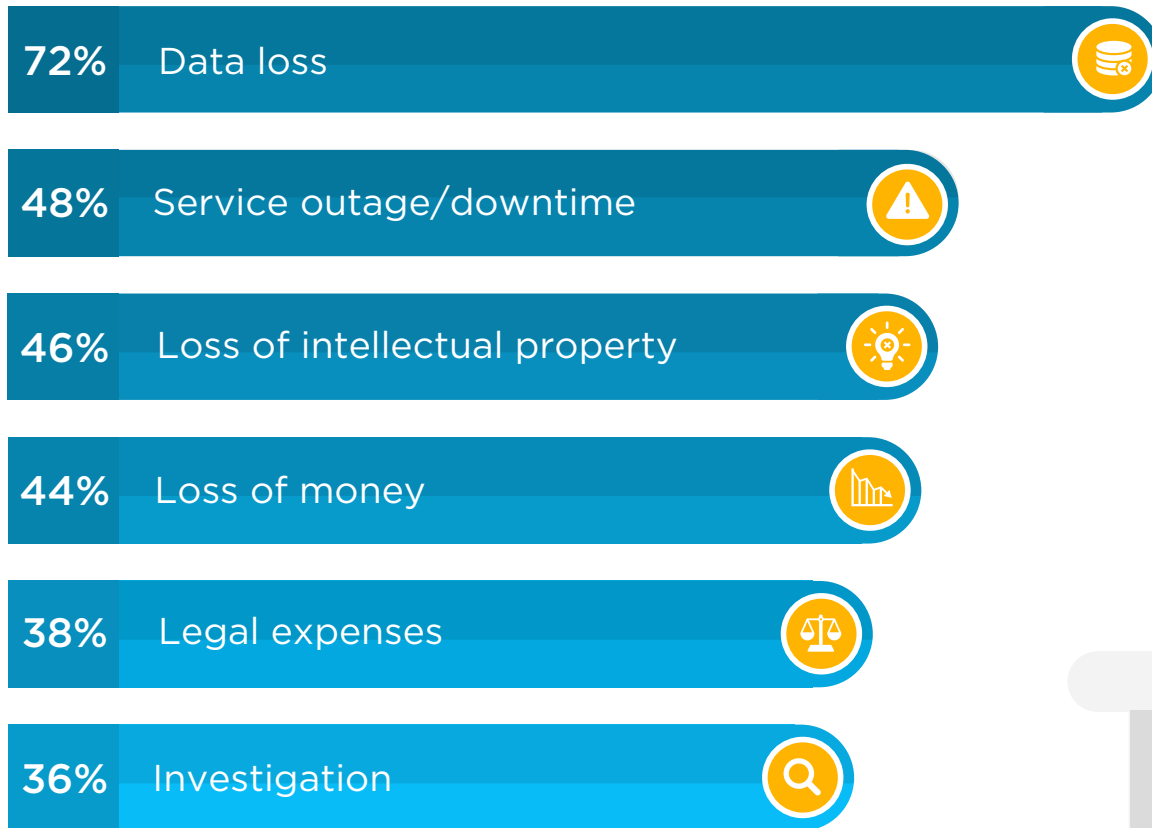

Civilian agencies worry most about phishing attacks and ransomware.

DOD/Intelligence agencies worry most about device theft.

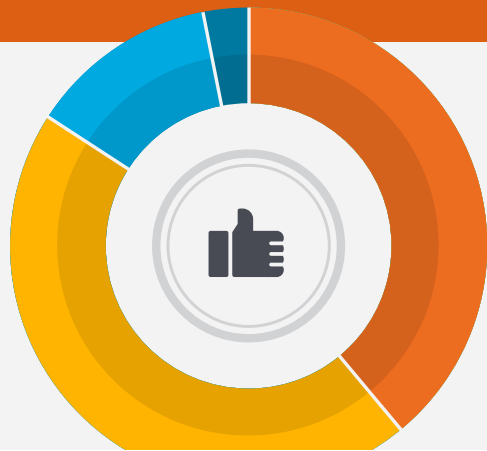

Top worries about the impact of an attack:

DOD/Intelligence agencies are especially worried about IP loss.

Agencies are happy with their technology, but still see risks.

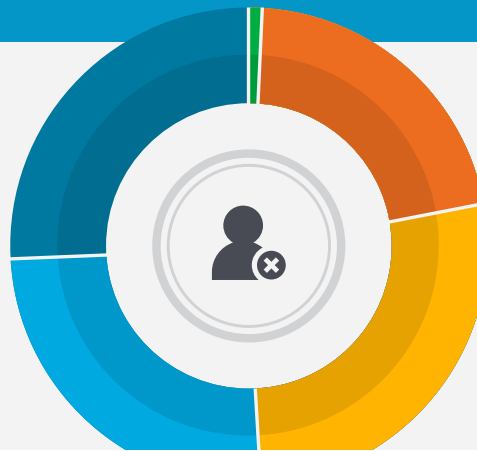

Most agencies see their technology as on par or better than Silicon Valley companies.

Federal government tech compared to Silicon Valley

- 39%** Our technology is more advanced
- 45%** Our technology is equally advanced
- 13%** Our technology is less advanced
- 3%** I'm unsure

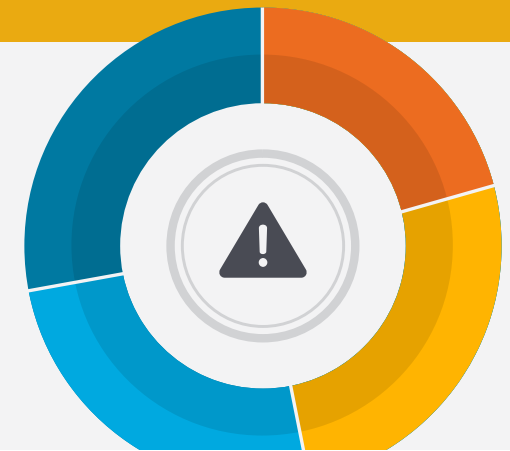

But nearly half don't believe they have adequate staff to protect from attacks.

My agency lacks amount of staff to protect from cyberattacks

- 21%** Completely agree
- 27%** Somewhat agree
- 25%** Somewhat disagree
- 26%** Completely disagree
- 1%** Not applicable

And nearly half don't believe their agency is fully prepared for attacks.

My agency is not fully prepared against cyberattacks

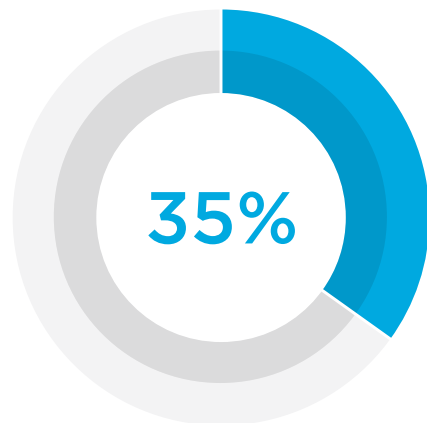

- 21%** Completely agree
- 26%** Somewhat agree
- 27%** Somewhat disagree
- 25%** Completely disagree

The **hybrid environment** of most agencies doesn't help.

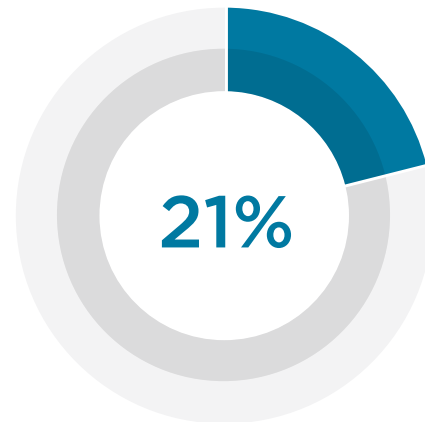

On average, agencies have 50.8% of their apps in the **cloud** and 49.2% **on-prem**.

FEDERAL IT DEPARTMENTS MANAGE LOTS OF APPS

Of agencies have between **25** and **49** apps.

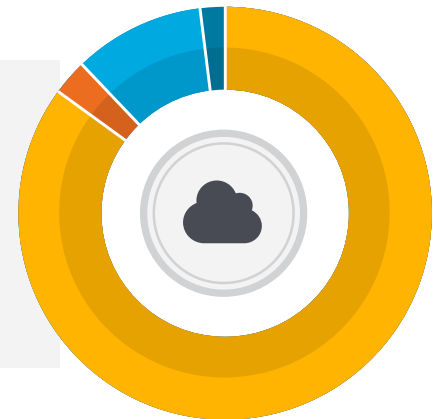

Of agencies have between **50** and **74** apps.

AND THE NUMBER IS ONLY EXPECTED TO GROW

Expectation re: growth of cloud apps in next two years

- 85% Will increase
- 3% Will decrease
- 10% Will stay the same
- 2% I'm unsure
