

**Poor password management
puts US companies at risk**

US companies have a misplaced faith in their password practices

Based on a survey of 300 IT professionals from companies across the United States

91%

of IT decision makers report having company guidelines around password complexity.

92%

feel their current password protection measures and guidelines are adequate.

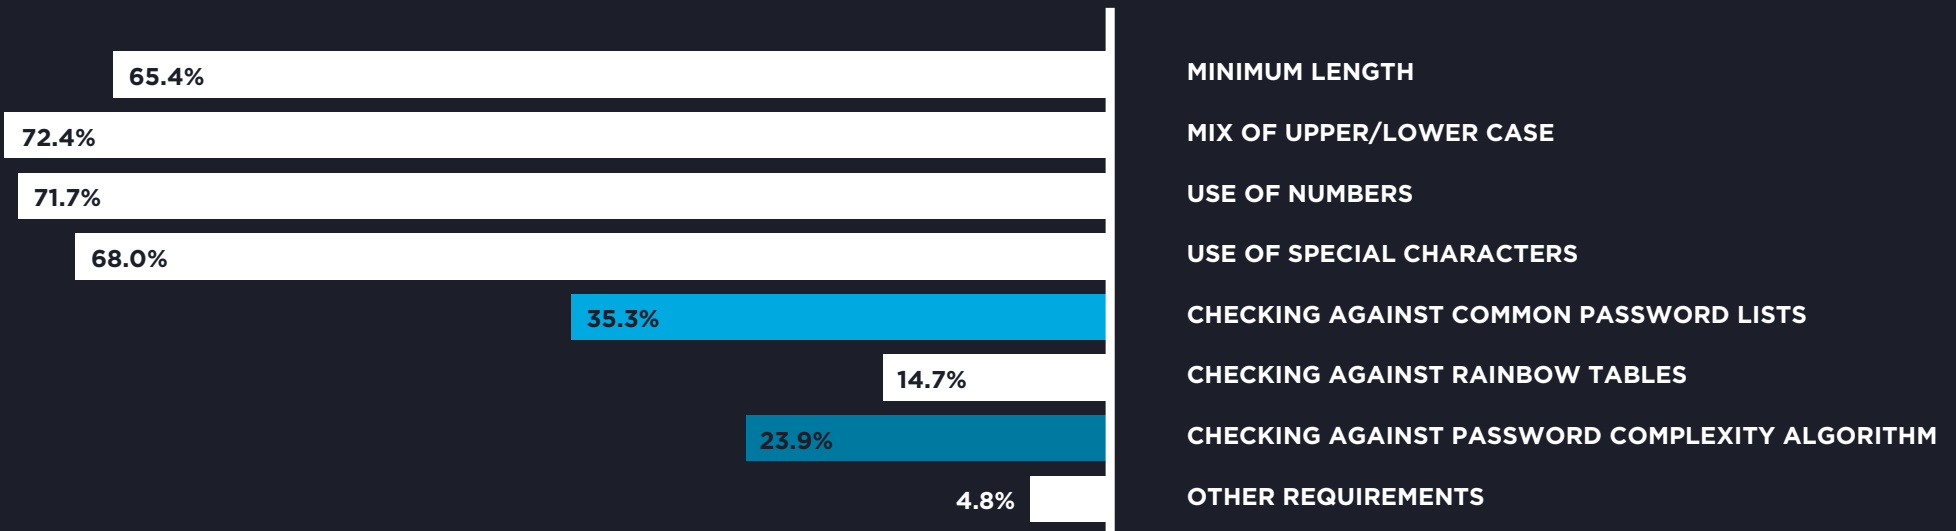

THE FACTS SAY SOMETHING ELSE

Companies have enforced password complexity, but few are using NIST's new best practices.

ONLY
35% check passwords against common password lists.

ONLY
24% use password complexity algorithms.

PASSWORD PROTECTION METHODS USED:

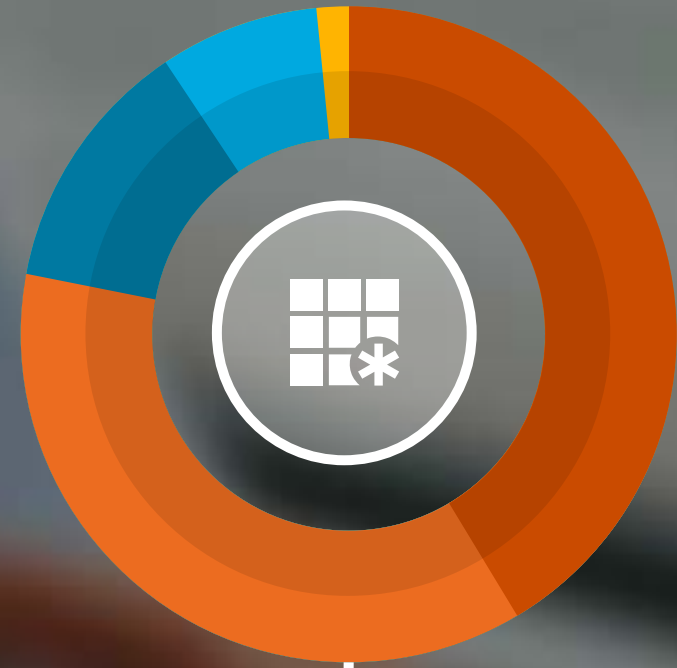

USERS HAVE TOO MANY PASSWORDS TO REMEMBER

37% of companies have 26 to 100 apps that require individual passwords.

20% have 11 to 25 apps requiring them.

YET

72% of people have trouble remember passwords.

NUMBER OF APPS REQUIRING INDIVIDUAL PASSWORDS

41.4% 25 AND UNDER APPS

36.7% 26-100 APPS

12.7% UP TO 200 APPS

8.0% UP TO 300 APPS

1.3% DON'T KNOW

NO WONDER COMPANIES ARE WASTING TIME RESETTING USER PASSWORDS

HOURS/WEEK SPENT ON PASSWORD RESETS

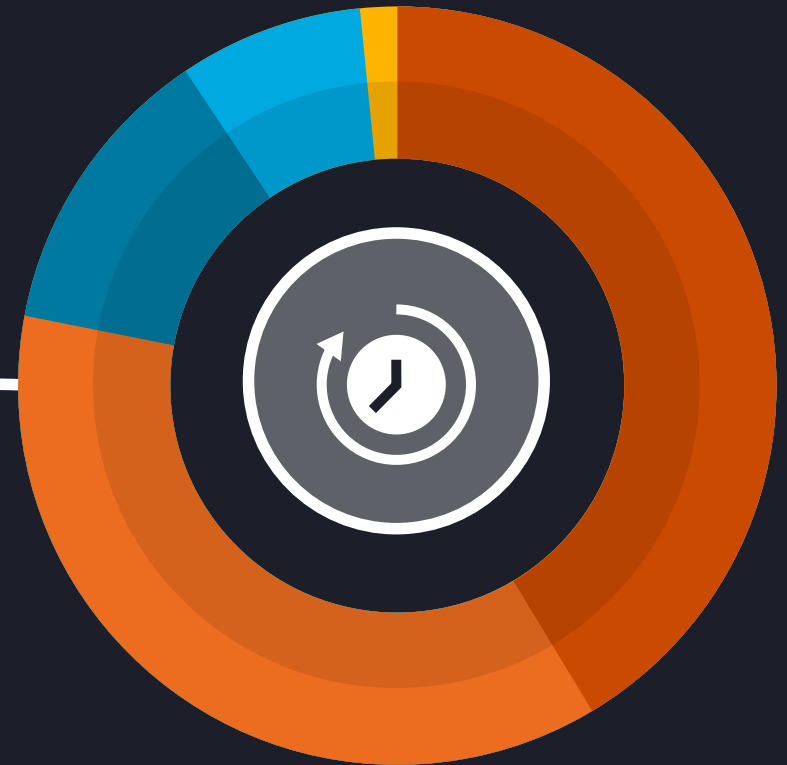

38% LESS THAN 10 HOURS

15% 6-10 HOURS

11% 11-20 HOURS

11.7% OVER 20 HOURS

24.3% DON'T KNOW

SPENDING A MEAN OF **2.5 MONTHS**
A YEAR ON PASSWORD RESETS.

WORSE, A SHOCKING

24%

of companies don't even know
how much time they're spending
on password resets.

THE SOLUTION: REDUCE OR ELIMINATE PASSWORDS

Single sign-on (SSO) with SAML eliminates passwords...

YET ONLY 42% OF COMPANIES ARE USING SSO.

42%

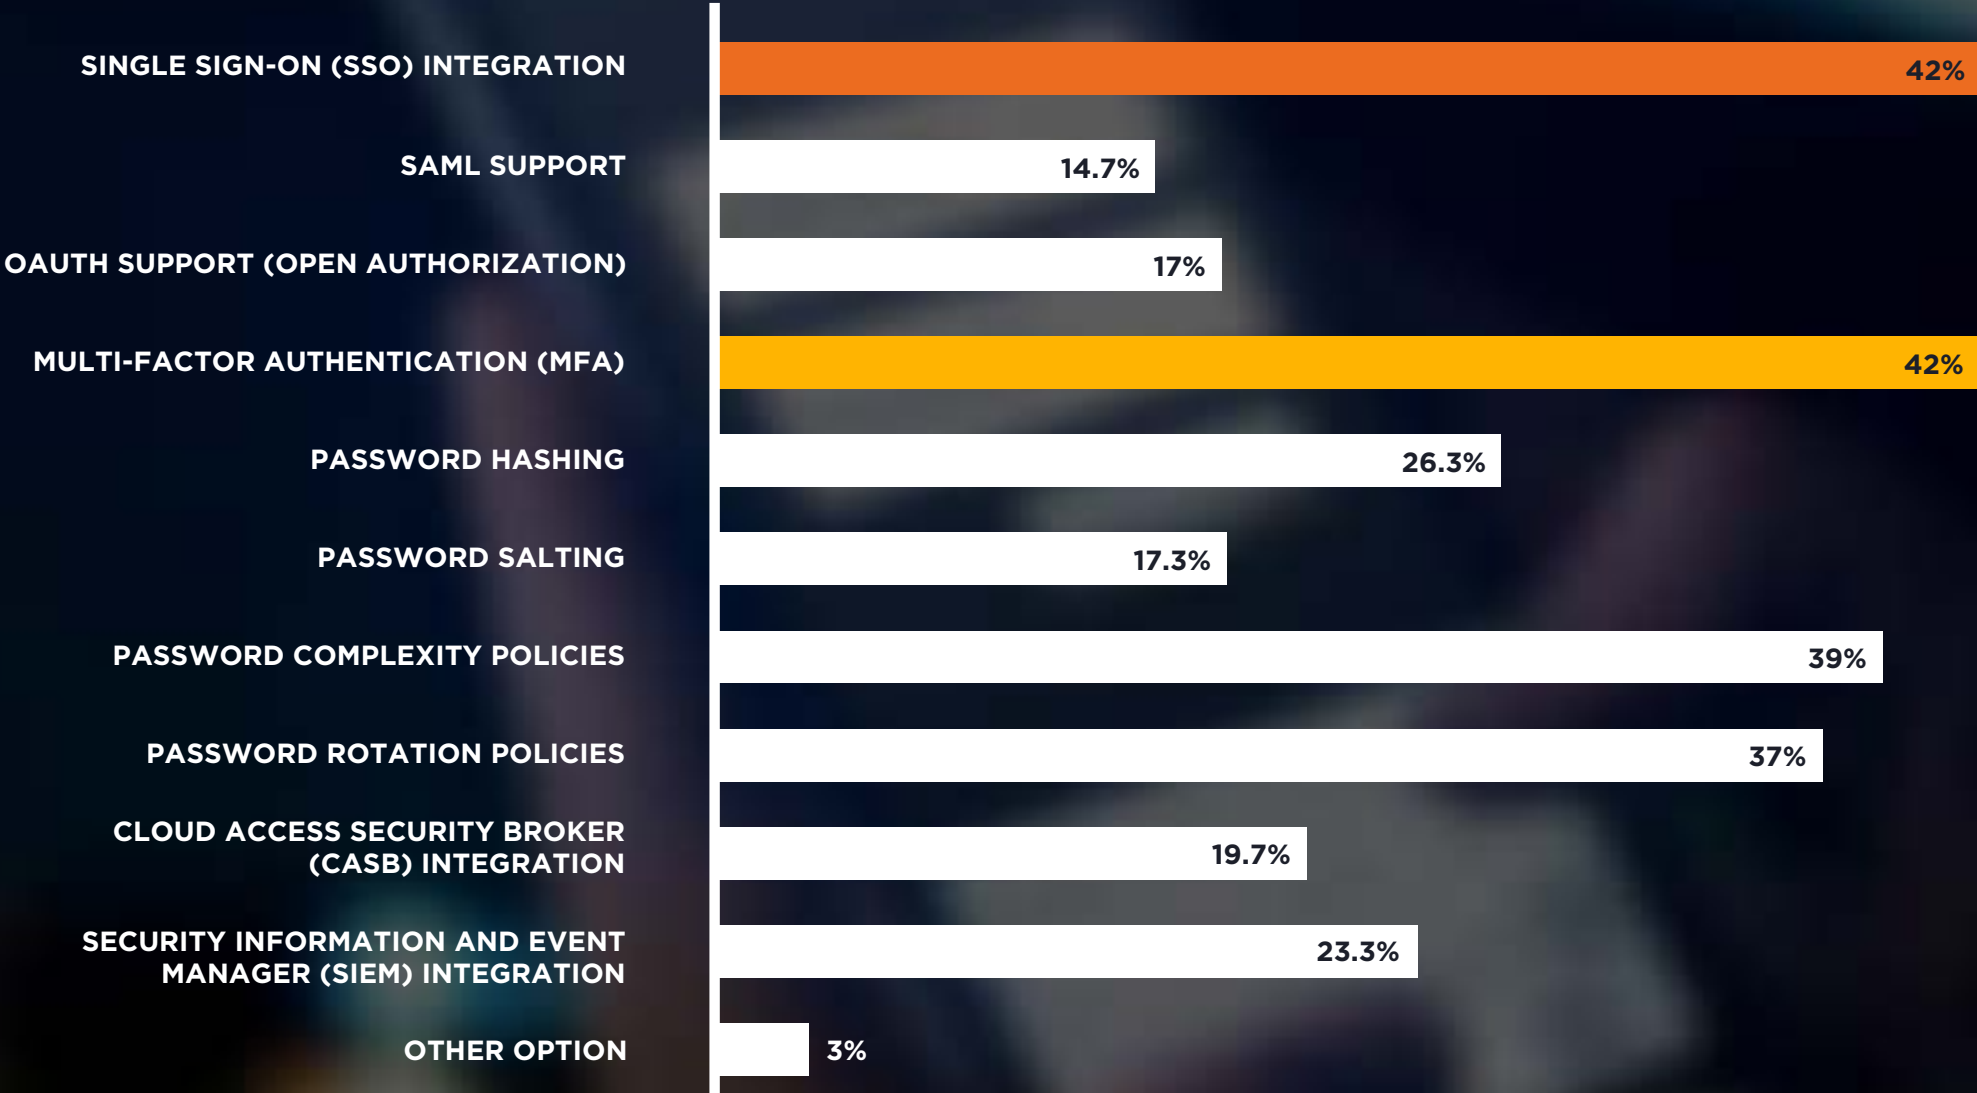

Multi-factor authentication (MFA) is the other critical tool in the fight against hackers.

BUT ONLY 42% OF COMPANIES REQUIRE MFA.

42%

METHODS COMPANIES ARE USING FOR MANDATORY AUTHENTICATION REQUIREMENTS FOR INTERNAL APPS:

THE RISK IS TOO HIGH!

With **1,244 breaches** in the US in 2018 alone, and **446 million** records exposed. Companies can't afford the risk of poor password practices.
